STRATUS TECHNOLOGIES
For an **Always-On** World

If always-on is a requirement, Stratus Technologies has a solution that fits

In today's always-on world, applications run under increasingly demanding conditions. With these escalating demands comes greater pressure to prevent even the smallest amount of application downtime. Companies are responding to this need for always-on solutions by searching for technologies that either conform to, or enhance their current IT infrastructures. Stratus Technologies is the leading provider of infrastructure based solutions that keep applications running in today's always-on world. Our solutions can be rapidly deployed without any changes to your applications. Our software and servers — combined with our people — enable us to identify problems that others miss and prevent downtime before it occurs.

Software Solutions

Reliable and flexible availability software with built-in virtualization

Supports Windows & Linux environments deployed on standard Dell®, HP®, IBM® & Intel® servers

Supports split-site deployment for disaster recovery

Platform Solutions

All-inclusive end-to-end solution provides worry free operation with integrated hardware, software and service

Intel® Xeon-based servers running Windows®, Linux®, VMware® & OpenVOS environments

Maximum uptime availability and application performance

Stratus' always-on solutions solve our customers' biggest needs

Flexible

Our solutions support a variety of operating systems and are designed to run in physical, virtualized or cloud environments

Easy

Our products are easy to deploy and manage, allowing your applications to run without specialized expertise.

Trusted

SMBs and Global Fortune 500 companies alike rely on Stratus to keep them up and running.

Bottom Line on Nines: Stratus defines always on

	Conventional, unmanaged	Typical cloud service level	Conventional clusters, VMs	Stratus Advantage
Always on Level	99%	99.9%	99.95%	**99.999%**
Downtime/Yr.	87.6 hrs.	8.76 hrs.	4.38 hrs.	**5¼ min.**
Annual Cost	$ 14,337,855	$ 1,433,785	$ 716,893	**$ 14,338**

Assumption: one hour of downtime costs the average company $163,674.14*. Calculation: 365 days x 24 (hours in a day) x 60 (minutes in an hour) x 60 (seconds in a minute) = 31,536,000 seconds in a year. At 99.999% uptime, there is 315.36 seconds of downtime a year or 5.25 minutes.

In Partnership with Industry Leaders

Customers expect us to bring always-on performance to the operating environments and products they use most often. We can offer sophisticated, high-performance solutions that integrate seamlessly into any IT infrastructure because of our strategic alliances with other open-systems technology leaders. These mutually beneficial partnerships deliver customer value that's impossible to achieve with either party working alone, beginning with initial installation and continuing throughout the application lifecycle.
